- Active verbal participation and involvement
- Deductive, linear, questioning and use of abstract thought
- Sequential argument and challenging posture
- Independence and autonomy of learners
- Having a point of view on issues and events

### ASSUMPTION ABOUT LEARNING

- Active verbal participation and involvement
- Deductive, linear questioning and of abstract
- Content and the
- Learning of the
- Having to on abstract

Fourth Speaker :  
**MR LEE MILSTEIN**  
Encouraging Creative And  
Critical Thinking In Learning

Highly creative people are very good  
at marshaling their brains into  
bilateral mode, and the more creative  
they are, the more they dual-activate.

Bilateral Training of the Brain is the  
Name of the Game.

**THE PATH OF THE LEFT HAND**

Fourth Speaker :  
**MR LEE MILSTEIN**  
Facilitation Techniques In  
Learning And Thinking

## A FACILITATOR

- The group facilitator's job is to make the group go to its own work.
- The role of the facilitator is to help participants learn how to work by providing the structure (ground) group members focused on the job. The facilitator's major role is to listen and connect.
- The facilitator addresses the process rather than the destination.

Fifth Speaker :

**DR. DR. TAUFIK PASIAK**

Brain Based Learning

SERI PACIFIC HOTEL  
Kuala Lumpur

ASSUMPTIONS	1	2	3	4	5	6	7	8	9	10
• HARMONY										
• CONTROL								✍	➡	♥

- brain consists of separate parts, but connected to each other
- Brain is the living organ (neuroplasticity)
- brain works all the time
